

## Chat from Sunday October 10 - May the Force be Among Us with Jean-Francois Vezina

Med: Aloha from Medgar in Hawaii

Diane Mcleod: One bubble of thought.

Eduardo Ochoa: One perceived reality of many

Beth Macy: A container for exploration and evolution.

Donna: A construct

Patricia T.: A world connecting all of us...

Donna: A field

Linda Ellinor: A cluster of stars and planets that travel together

GeorgeFox: An experience of infinite wholeness

Joan Atkinson: Don't know. If they are infinite how can there be many

Med: One verse

Taylor Burton: A universe = "one word" or "sound" or vibration; i.e., a unifying vibration, containing energy and objects and life.

Niels Hoffmann: A complete system of everything

ReGins Kuksy: Images I have experienced in this group of talks make me realize ... MY BODY is a "Contained Universe" participating within various fields.

Diane Mcleod: Dream

Patricia T.: Do we mostly « feel » an archetype? ...

Taylor Burton: Archetype = a particular energy organization that represents as signifiers

ReGins Kuksy: Love

Vicki Hazlett: Collective consciousness

Eduardo Ochoa: Universal Consciousness

Linda Ellinor: The force is energy that impacts the whole universe in terms of the whole...an energetic that makes things whole

Med: Energy, Vibration, Frequency & Rhythm

Jena Axelrod: The Magician

Patricia T.: The Force is also the Intention

Niels Hoffmann: GOD

Eduardo Ochoa: Light particle

Niels Hoffmann: Vacuum points

James Peat Barbieri: Energy-Mass

Taylor Burton: Groovy spinning image of yin-yang!

Albertina lourenci: Dark matter/dark energy

Taylor Burton: Yin-yang literal meaning: "dark-light."

Eduardo Ochoa: Interesting and so true, Power

Eduardo Ochoa: power ~ love

Joan Atkinson: I saw star wars in the 70's

Taylor Burton: So glad that mechanization/automaton/technocracy is being brought into question. Vital.

Diane Mcleod: Love

Vicki Hazlett: Who am I?

James Peat Barbieri: Escape

Patricia T.: What does that mean..... the disturbance ... a change in the intent?

Taylor Burton: Hear, hear! Re: courage to leave rote family gravity field! YASS!

Patricia T.: The pivot..... turning on herself

Taylor Burton: Reconciliate by befriending and dialoguing with "the dark side"

Eduardo Ochoa: Stop seeing "the other" in our fellow humans, we are all one

Albertina lourenci: The reconciliation between light and shadow is only throwing light on the shadows

Donna: To see beyond the mask to KNOW we are the same primori

Donna: Primary source

Eduardo Ochoa: and putting some shadow in light

Eduardo Ochoa: both and

Donna: Allowing the unified field to act in the world

Albertina lourenci: Grounding light is powerful image

Joan Atkinson: no

Taylor Burton: That is an amazing connection: the eye thing, back to the beginning of the talk!

Taylor Burton: Embodying the light and the "dark-as-anchor." The human body is a vehicle, a womb (or petrie dish, if you prefer) for the Force.

Eduardo Ochoa: Indeed - our reality is limited by our language

Taylor Burton: Foucault -- language

Vicki Hazlett: Dune opens in the U.S. on 10/21

Taylor Burton: How do we keep "emotions" (water) in relational dynamics, given automation, technology, mechanization?

Niels Hoffmann: How do we make the best future for everyone?

Joan Atkinson: How is life defined

Tom Hartigan: Is the Earth still habitable in 2050?

Bel Mattos: Fly

Donna: Allow the unmanifest to resolve through creative consciousness

Patricia T.: Your challenge will be to create more cooperation between countries to preserve Earth... be more ecological...

ReGina Kuksy: Breathe!

Diane Mcleod: Stop suffering of our planet and everything. Stop hurting mother earth so our children can live and love.

Bel Mattos: Learn ET languages

valjeannepaxton: n French OR means gold

Eduardo Ochoa: Transformation to a higher level of consciousness and perhaps we will have contact with alien civilizations by then

Albertina lourenci: We will be able to live in Mars as well as go sightseeing in the solar system

Bel Mattos: Sightseeing solar system would be great

Eduardo Ochoa: Live in a paradigm of complementarity - collaboration, leave the materialistic-reductionistic paradigm behind

Taylor Burton: BINGO, re: viewing Earth also as child. Healthy parent-child relations. Starting with personal psyche integration.

GeorgeFox: What ways, dreams, exploring of the Cosmos have you discovered to call forth our fundamental kindness, compassion and collaborating?

valjeannepaxton: There is a much movement and power in the image which makes me think of a fairly new therapy termed Energy Psychology-

Eduardo Ochoa: Very concerned about Elon Musk, particularly the efforts to build up AI

Taylor Burton: Me too, Eduardo Ochoa. Not looking forward to the chip that Musk, Kurzweil, etc., say must be planted in each human brain. It seems a bypass, alluded to earlier by our speaker today (i.e., using technology instead of facing our Selves).

Eduardo Ochoa: Agree Taylor, quite concerning, just need to be aware

Taylor Burton: Yes, be aware, and to act.

Albertina lourenci: Your talk enabled me to watch Star Wars. My husband loves it. I did not like it at all.

Dale McDonald: I think we start deep within ourSelves: How can we experience the driving-energy of our “others”, as we explore the edge of fear that rests between us and our future

Taylor Burton: Dale, YES. It starts with each Self/Psyche. Facing and dancing with Self, in life-promoting ways.

Albertina lourenci: I will be your guest at hilbert hotel for sure

lindawallace: Thankyou for your talk and in particular for re-energising the idea of being hopeful about the future — we need to remember it!

Eduardo Ochoa: Wonderful talk, thank you!!!!

Eduardo Ochoa: Looking forward to watch all these movies again!!

Taylor Burton: Superb today! Reinvigorates me! Gives me hope there are playful brainiacs!

L'Aubergiste: Thanks !

L'Aubergiste: May the force be among us:)

Eduardo Ochoa: May the force be with us all!

Dale McDonald: Thank you deeply provocative talk
