

**Chat from Saturday October 23 - Is the Multiverse in the Mind or is the Mind in the Multiverse? with Bernard Carr**

Gary Goldberg: Persistent mysteries:

Gary Goldberg: Gravity.... Dark Matter... Dark Energy... Quantum Nonlocality... Supra-Nominalistic phenomena...?

JoseMoraO: In my opinion, mind is fundamental but, it's the principle of the loop, because work through thinking, memory and language: the duality itself. It forms part of a singularity that is a feature of this universe and not useful to understand other universes

David Bilyeu: Paradigm and Science - Thomas Kuhns?

Gary Goldberg: Galileo's error according to Philip Goff was to assume quantitation is ultimately descriptive of the totality, when, in fact, conscious experience—which is all that we really have to work from—is fundamentally qualitative... (cf. Bernardo Kastrup 'Science Ideated. The Fall of Matter and the Contours of the Next Mainstream Scientific Worldview')

Albertina Lourenci: After having awakened kundalini in June 1976 following an attempt of suicide, I was able to continue alive because of "action in astral body" leading to quantum tunneling behaviors

Gary Goldberg: Bohm's concept of 'Soma-Significance' is actually helpful in proposing a binding of physicality and the relational—ie. relationality.

Vicki OLeary: Get into trouble by whom?

Albertina Lourenci: Spirit, energy and information: essential elements of the urban ecosystem, master thesis defended in 1988 to get a degree in architecture. I had to argue inspired by Popper if you undermine metaphysics, you also undermine physics. I was approved

Med: What trouble? Mind and spirit seems to have created 'science'

JFV: We need a new light and a new paradigm:)

Med: Bohm

David Bilyeu: As a philosopher I love speculation - glad you'll continue the talk.

Vicki OLeary: I too, speculative is expansion of science

Elise: Listen to Bohm's conversations with J Krishnamurti

Elise: The Ending of Time by David Bohm and Jiddu Krishnamurti

Gary Goldberg: Recognizing signification or 'semiosis' as real and able to 'act' through interpretive process and 'trans-action' without reference to physical causality opens up a new realm of a-causal action—ie. through the action of signs that is inherently linked to 'alterity'. Sign action is what gives us 'more than this'...more than 'this-ness' or 'thing-ness'... ie. 'supra-subjectivity'...

Mel Siegel: Does “don’t try to visualize this [e.g., an 11 dimensional space] because you can’t” mean there are limits to consciousness, which negates its fundamental nature?

JFV: Can we imagine that the new dimensions are not placed after the 4th dimension.... But enrolled in the field between the 3 and the 4th dimension?

JFV: But enrolled in the field between the 3 and the 4th dimension ?

JFV: So it will be circular curved dimensions and not linear dimensions....

Gary Goldberg: This effectively is the moral of the blind men and the elephant parable... Cartesianism is

Gary Goldberg: ‘foundational’ suggesting that reality is directly accessible to the individual... when it is not...

JFV: Accessible to an individual....and accessible to a field of consciousness is not the same level.....

JFV: Thanks for the light.... This idea came now.... Individuation is the expansion of our universe and our scales of Consciousness....

JFV: So Individuation can be in a personal field and a collective field

JFV: Rovelli said that The Flow of time is linked to entropy.... Can we imagine that Consciousness produces a local field of entropy in universe ?

Gary Goldberg: We make the mistake of thinking that our personal abstract rational internal map is the concrete experiential reality, when it cannot be. Abstraction involves temporal digitalization, ie. cinematic frames in a stop-action sequence... Our left hemispheric perspective for which time is not real...

JFV: So there is a Division Point between Real Time and Imaginary Time Gary?

Gary Goldberg: There is a division between time-sampling, and the temporal continuum which is that of infinite depth in each moment that contains possibility...

JFV: Maybe this is the Pivotal Point Between a Universe and the multi versions of that Universe that we experience as collective and individual field of Consciousness .....

Gary Goldberg: The left hemisphere samples time in the process of abstraction, while the right hemisphere experiences time as a continuum, as real.

JFV: and between the Right and the left, there is the Up and the Down Dimension? or the Inner and the outer dimensions?

JFV: Hemispheres... And The Integrative Higher Self Multi spheres as Jung proposed in the mandala symbol....

Gary Goldberg: The left hemisphere perceives relative to Self which is fundamentally intermittent. The right perceives relative to non-Self—ie. Alterity or externality—which is continuously present.

JFV: Do you believe or experience a symbolic space where left and right are the same sphere?

JFV: Do the Hemispheres of a planet vibrate like the Hemisphere of a human Brain ?

Vicki OLeary: Threshold experiences are becoming so common shouldn't we include this in our science and study of science without filter now?

Annette Shaked: Love "Only sees stars at night, but (and) they are there all the time" -- musing, how true for so many other things as well!

JFV: And it is in dark space and dark time that the most important stars rise in our Consciousness

Gary Goldberg: Not sure where to find the Hemispheres of the planet... but what appears clear is that the left hemisphere partitions or fragments time and space, while the right hemisphere links to vibration which is continuously active in the time dimension...

JFV: Maybe the Hemispheres of our planets are not only searchable in the space dimension, but also in the time dimension... The Event of the Covid in our history created fragmentation in a lot of spheres....

David Bilyeu: Yes, continue....please

JFV: In French, a present is a gift....

Albertina Lourenci: Think about the hummingbird and the tortoise that cannot see each other

JFV: Extra dimensions are maybe in the infinite space and time that are present in PI.....

JFV: 3.1416.....

JFV: Where Am I Me?

JFV: When Am I me?

JoseMoraO: You are you just because

JFV: Just because....

JFV: For how much time you will be you?

JFV: Since how many times you are you?

JFV: Am I the same me, here in the virtual space than in the real space?

JFV: Passionate!

JFV: Thank you so much Bernard!

Gary Goldberg: For left-hemisphere meta-consciousness there is an intermittency of vision related to the phenomenon of 'apparent motion' which is the basis for the cinematic experience...

Med: Bravo! Encore!! Spectacular!!! Existence and consciousness is the focus of my work...

JFV: Super Inspiring!

Albertina Lourenci: Mind-bending talk Bernard!

Viola Olsen: Fantastic, Bernard. Thank you for taking the time to be so thorough. I've been super enlightened and loved the speculation and mystical parts above all.

Donna: Passion for specs

Derek Bridges: Such a rewarding experience to be present in this time and space (and consciousness). Thank you

Gary Goldberg: We are surrounded by a 'Markov blanket' that separates our individual consciousness from 'Mind-at-Large'...

Donna: Outer vision diminishes so inner vision expands until Univision - All marries All

Gary Goldberg: In neuropsychiatric terms, the metaphor is with MPD—multiple personality disorder...

Donna: Exuberance - Life wants to grow

Gary Goldberg: We are each different individuated conscious personalities contained within 'Mind-at-Large'...

Zoe: Great Thanks for such a riveting & fantastic presentation!

Leili First: Great presentation and discussion - thank you!

Albertina Lourenci: People do live on telepathy and even makes lots of money! Billions of dollars! So hilarious philosophers live in the stone ages! Those that are mystical do not need to prove to the mind their experiences. They experience its power to create a better world!

Donna: If we take responsibility for our past accumulated (and limited ideas) we can have an intention that "now" all are open to expanding consciousness of let say the skeptics. Aren't they only skeptics as an image in the mind, therefore we are projecting a past view on them that they will continue to be the way we say they are. Why not erase the past picture and share without hesitancy. So what if someone is unconscious. We won't know if we don't give our self the right to be free. We are only unfree if new clan to be.

Donna: Claim to be...

Alan Malby: Tremendous, opening out, freeing up so much thinking. Thank you Bernard and everyone.

David Bilyeu: Will there be a Surtra opened for continuing the discussion?

JFV: Thank You James, Shantena, thank you the Pari Center and than you Bernard. Talk to you tomorrow!
